## CSS v3

Periodical update of approved technologies.

1. **Is the description still up to date?**

Please update.

Cascading Style Sheets (CSS) is a style sheet language used for describing the presentation of a document written in a markup language. Although most often used to set the visual style of web pages and user interfaces written in HTML and XHTML, the language can be applied to any XML document, including plain XML, SVG and XHTML, and is applicable to rendering in speech, or on other media.

2. **What applications are supported by this technology?**

Please select.

STANDARD Banking Frontend

Business Pa

3. **What is the investment strategy of this technology?**

Please select from the list.
