Welcome to our webinar!

End-User Application
Governance

Djurdjija Radojevic

06/03/2026

Turn End-User Applications into Enterprise Assets:

Governance that works

ADOIT
Enterprise Architecture Suite

The Problem:

Invisible Architecture

- ▶ End users are building tools that behave like applications: AI-assisted workflows, prompt-based automations, low-code solutions
 - ▶ Often not perceived as “applications”, **but**
 - ▶ They do touch enterprise data, create dependencies and can become critical overnight

Most organizations already have “Shadow IT Architecture” – they just don’t know it.

Why Classic Governance Fails

... and slows down innovation

- ▶ Assumes central control
- ▶ Assumes stable solutions
- ▶ Requires approval before use
- ▶ Too slow for AI-driven end-user applications

**Shift from documentation to
orchestration.**

Solution:

End-User Application Governance with ADOIT

- ▶ Visibility, insight and learning instead of control
 - ▶ Register, don't restrict
 - ▶ Governance is gradient
 - ▶ Federated by default

Register – Appprove – Orchestrate

Turning Shadow IT into Enterprise Intelligence

Enterprise Architecture Suite
by boc-group.com

- ▶ Registration captures critical information
- ▶ EA can see how applications connect to processes, capabilities, technologies, etc.
- ▶ Insights drive risk reduction, optimization, and hidden opportunities

Orchestration is about connecting the dots, not blocking innovation.

LIVE DEMO

Make your business run better.

EA as Orchestration Engine

Benefits & Outcomes:

- ▶ End users innovate freely
- ▶ Governance ensures visibility and approvals where needed
- ▶ EA connects signals across enterprise
- ▶ Leadership gains evidence-based decision support
- ▶ EA maintains a living map of enterprise change

Governance as a Signal, not Gate

- ▶ Registration ≠ Approval
- ▶ Approval ensures only secure, valuable, non-duplicate tools land in the repository
- ▶ EA orchestrates where involvement is needed, it doesn't block innovation
- ▶ Repository enables valuable insights, early risk signals, actionable roadmaps, and adaptive governance

In an AI-driven enterprise, the goal isn't to approve everything – it's to ensure what is approved is visible, understood, and reusable.

Q&A Session

Feel free to send any questions our way even after the webinar.
